Dear Dr. Nicholson,

We are pleased to include “Gravity waves in Jupiter's Stratosphere, as measured by the Galileo ASI experiment” for submission to *Icarus*. This manuscript investigates the temperature fluctuations in Jupiter's stratosphere observed by ASI, and discusses the implications for comparative aeronomy and Jovian energetics. Suitable reviewers include Dick French, Darrell Strobel, and, on the terrestrial dynamics side, Edmond Dewan (Air Force Research Lab), David Fritts (Colorado Research Associates), or Chet Gardner (U. of Illinois).

Thank you,

Leslie Young
